

Community Support Services

As a Christ-led church family, we strive for awareness of the needs of our brothers and sisters within our congregation and our community. We look for ways to assist and support them with issues affecting their daily lives and we recognize that good health and peace of mind are essential to the well-being of all. We recognize the need of many within our church family and beyond our walls to be educated and supported in the life changes we all experience. These life changes can be physical, mental, emotional or spiritual and can have major impacts on each individual. We hope the information offered here may be of help to all.
